

# Specifications Guide

## SOME OF OUR OTHER INNOVATIVE PRACTICES INCLUDE:

- Developing lateral pruning regimes to produce more compact and vigorous root systems
- Perfecting cultural practices that produce uniform height and diameter seedlings
- Timing of lifting and grading for optimum dormancy
- Precise grading and packaging to customers' requirements.

## QUALITY CONTROL AND GRADING

Our aim is to supply young trees which will establish themselves rapidly and provide the best possible start for the production of high quality mature trees. By using the latest propagation techniques and production methods, developed, tested and refined over many years, we ensure our tree stocks are of the highest quality. Throughout winter we aim to dispatch our trees to our customers in the best possible condition. We have four grading sheds which are operational throughout winter.

Our staff and supervisors are trained to ensure grading and packing are of a high standard. With careful handling, prompt delivery and establishment, planting success will be maximised.

## HEIGHT GRADES

No.	(A)	(B)	(C)	(D)	(E)	(F)	(G)	(H)	(I)
Age	1/0	1/0	1/0	1/0	1/1	1/1	1/1	1/1	1/1 & 1/2
Height	15/25cm	25/50cm	50/75cm	75/100cm	25/50cm & 50/75cm	50/75cm	75/100cm	100/1.3m	1.3m
Use	Growing on lines for nursery trade	Grasses, conifers, smaller trees	One year tree seedlings	Vigorous one year tree seedlings	2 year old transplanted conifers	2 year old transplanted trees			2 & 3 year old transplanted trees
